

ROUND CAPE HORN.

Nearly one hundred ships sail from the island of Nantucket on voyages around Cape Horn. These ships are absent from three to four years. There are few families on the island, who have not some relative absent on these voyages of hardship and danger. It is sometimes said that the families of Nantucket 'get used' to these painful separations. But it is not so. The hour of parting is often almost like the bitterness of death. But the lapse of time in this, as in all other cases, effaces the freshness of grief. The phrase *Cape Horn*, is necessarily a very common one upon this island. A stranger who visited this place, not long ago, wrote the following amusing lines:

Ask any question in this town,
Of any one, by night or morn,
'The answer will be always found,
'Round Cape Horn.'

I ask the ladies where I call,
'Your husbands—are they here or gone?'
And get this answer from them all,
'Round Cape Horn.'

I asked a child I chanced to meet,
'Where is your pa, my dear, this morn?'
She answered, with a smile most sweet,
'Round Cape Horn.'

I asked a boy, as on he skipped,
'Where now, my lad, at early dawn?'
He answered, 'for he then had shipped,
'Round Cape Horn.'

I asked an aged man, one day,
How time had passed since he was born;
'My years he said, 'have passed away
'Round Cape Horn.'

I asked a sailor bound away,
Where I should write when he was gone,
He said, without the least delay,
'Round Cape Horn.'

I asked a merchant for a fee,
He turned and answered me with scorn,
'My property is all at sea,
'Round Cape Horn.'

I then to a mechanic went,
And he likewise bid me begone;
For all he had, and more was sent
'Round Cape Horn.'

I asked a sister, whom I saw,
Quite finely dressed, in silks and lawn,
'Where's your brother?' she answered 'La!
'Round Cape Horn.'

I asked a maiden by my side,
Who sighed, and looked to me forlorn,
'Where's your heart?' She quick replied,
'Round Cape Horn.'

'I asked a widow why she cried,
As she sat lonely, taking on,
She said her husband lately died
'Round Cape Horn.'

I asked a mother of the dead,
From whom support she long had drawn,
'Where did he die?' She merely said,
'Round Cape Horn.'

I said, 'I'll let your father know,'
'To boys at mischief on the lawn,
They all replied, 'Then you must go
'Round Cape Horn.'

In fact I asked a little boy
If he could tell where he was born;
He answered with a look of joy,
'Round Cape Horn.'

There's scarce a thing I chance to see,
Brought here the island to adorn,
But either was, or soon will be,
'Round Cape Horn.'

Thus merchants, sailors, women, men,
The old, or children lately born,
To all you ask, reply again,
'Round Cape Horn.'

Of dangers on the fickle seas,
'Tis useless any one to warn,
This sentence has such power to please—
'Round Cape Horn.'

*Alluding to a child whose mother accompanied her husband on one of his voyages.

Some anti-temperance genius—the 'noblest

JOHN JACOB ASTOR.—The Pittsburgh American relates the following characteristic anecdote of Mr. Astor, of New York, who is said to be worth \$25,000,000:—

John Jacob Astor is described as not without cleverness, but generally cold and abstracted, with little reverence for rank or greatness. A Russian nobleman, who was minister to this country, had made his acquaintance, and when about to embark for home, called upon him at his counting house. Mr. Astor received him very politely, and after a short conversation the minister took his leave, bowed out of the door by his host, who immediately after turned round to his clerk, "does that fellow owe us anything, Mr. G.?"

Mr. S. one of his favorite fur company agents met him one day in the streets, carrying home a fish he had bought in the market.

"Why do you lug that thing through the streets," said S. "Can't you get somebody to carry it?"

"Here, do you carry it!"

"No, not I. I hate fish."

"No you don't," said Astor, "you are too proud. You and I would be very differently situated should we ever become poor. You would not know what to turn your hand to, while I would just take a bundle of muskrats and begin the world again."

He had taken a tract of land at Green Bay for a debt of \$5000, which he had instructed his agent at Mackinaw to sell for the same money. For several years no one bid for it. During the rage of land speculations in that country, a New York speculator named B. had seen it, and asked the agent if it was for sale, and the price. The agent, thinking it might probably be worth something more than \$5000, asked what he would give! The other told him he would give \$50,000. The agent, a matter-of-fact man, who confined himself closely to the business of his agency and was little aware of the revolutions going on around him, was amazed. "I think you can have it, but I must consult Mr. Astor. I have not the least doubt, however, but that he will give it to you." Mr. Astor's answer was to this effect—"I had no idea it was worth so much. There is no better judge of the value of property than Mr. B. and if it is worth \$50,000 to him, it is worth \$50,000 to me—tell him he can't have it." It now forms part of the town of Green Bay, laid off by Mr. Astor in lots, and sold for an immense amount in 1835 and '36.

Mr. Astor came to this country from London in 1784, and landed at Baltimore. He commenced business by the exchange of musical instruments for peltries. In the first year of the present century, when he was in his 37th year, he was estimated to be worth \$250,000.

THE FOOD OF MAN.—The Ganese Farmer gives this brief summary of the native countries of our most familiar plants:

"The potatoe is a native of South America, and is still found wild in Chili, Peru and Montevideo. In its native state, the root is small and bitter. The first mention of it by European writers, is, in 1558. It is now spread over the world. Wheat and rye originated in Tartary and Siberia, where they are still indigenous. The only country where the oat is found wild is in Abyssinia, and thence may be considered a native. Maize or Indian corn, is a native of Mexico, and was unknown in Europe, until after the discoveries of Columbus. The bread fruit tree is a native of the South Sea Islands, particularly Otaheite. Tea is found a native nowhere except in China and Japan, from which country the world is supplied. The cocoa nut is a native of most equinoctial countries and is one of the most valuable trees, as food, clothing and shelter are afforded by it. Coffee is a native of Arabia Felix, but it is now spread into both the East and West Indies. The best coffee is brought from Mocha, in Arabia, whence about fourteen millions of pounds are annually exported. St Domingo furnishes from sixty to seventy million pounds yearly. All the varieties of the apple are derived from the crab apple, which is found native in most parts of the world.

The peach is derived from Persia, where it still grows in a native state, small, bitter, and with poisonous qualities. Tobacco is a native of Mexico and South America, and lately one species has been found in N. Holland: Tobacco was first introduced into England from North

Carolina, in 1586, by Walter Raleigh. Asparagus was brought from Asia; cabbage and lettuce from Holland; horse radish from China; rice from Ethiopia, onions and garlics are natives of various places both in Asia and Africa. The sugar cane is a native of China, and from thence is derived the art of making sugar from it."

COLD FEET.

Consumption, Liver Complaint, pains in the chest or side, falling of the hair, one or the other always accompanies cold feet. It is a sure sign of disease in the system to have cold feet. The Salve will restore the insensible perspiration and thus cure every case. It is infallible for this.

ASTHMA, HEMIPLEGIA, OR PARALYSIS.

temptation."

POETRY.

From the Boston Courier.

BALLAD OF THE ALARMED SKIPPER.

Many a long, long year ago.

Nantucket skippers had a plan

Of finding out though "lying low,"

How near New York their schooners ran.

The custom was to grease the lead,

And then, by sounding through the night—

Knowing the soil that stuck, so well.

They always guessed their reckoning right.

A skipper grey, whose eyes were dim,

Could tell, by *tasting*, just the spot,

And so below he'd "dowse the glim"—

After, of course, his "something hot."

Snug in his beth, at eight o'clock,

This ancient skipper might be found ;

No matter how his craft would rock—

He slept—and skippers sleep profound !

The watch on deck would now and then

Run down and wake him, with the lead—

He'd up and taste, and tell the men

How many miles they went ahead.

One night 'was Jonathan Marden's watch ;

A wag was Joe—the pedlar's son—

And so he mused, (the wanton wretch)

To night I'll have a grain of fun.

We're all a set of stupid fools,

To think the skipper knows by *tasting*

What ground he's on—Nantucket schools

Dont teach such stuff, with all their basting !

And so he took the well greased lead,

And rubbed it o'er a box of earth

That stood on deck, (a parsnip bed,)

And then he sought the skipper's berth.

"Where are we now, sir? please to taste"—

The skipper yawned, put out his tongue,

Then op'd his eyes in wondrous haste,

And then upon the floor he sprung !

Thes skipper stormed, and tore his hair,

Thrust on his boots, and roared to Marden—

"Nantucket's sunk, and here we are,

Right over old Marm Hacket's garden !"

Sons of the Ocean.

At the late Anniversary of the American Bible Society, the Rev. Mr. Spaulding, Secretary of the American Seamen's Friend Society, called special attention to the *des-titute of the sea*. Forget the sailor! said he,—the man who keeps his nightly watch, who faces the peltings of the storm, and whose soul is often melted because of trouble! Where is our *sympathy*? Forget the man who is the carrier of Bibles and missionaries to the *heathen*; who is the gate-keeper on the highway of nations; who has made many of our merchants princes, and is our defence in time of war! Where is our *gratitude*!

He remembered that when our gallant *Decatur* trod the deck slippery with blood, and the uplifted sabre was about to strike him down, an American *sailor* rushed forward, and himself received the blow of that sabre! And should the sailor be forgotten? Forget the sailor—who, when abandoned, is like Milton's fallen angel,—compassing the earth for maturing and executing plans of mischief; but who, when converted, was the angel, flying in the midst of Heaven, giving the everlasting Gospel to the nations! Where is our humanity? Forget the man who has beneath his rough exterior a soul of more value than all the treasures of the East! No; we must not forget the *two million sons of the ocean*! Put the Bible into their hands, and *they will prize it*, and will give it freely to all the nations now sitting in spiritual darkness.

In Mr. Wigan's very curious work upon

ITEMS.

It is stated that an old lady in Iowa, while recently in the woods, was bitten on the end of her nose by a rattlesnake. The old lady recovered but the snake died! Coroner's verdict—*poisoned by snuff*.

AFFECTIONS OF THE LIVER.—Every INVALID SHOULD READ AND REFLECT IF THEY DESIRE A RESTORATION TO HEALTH.

I venture to affirm, says an eminent writer, that the grand source of health and disease is connected with the natural or disordered function of the liver, and that every chronic or lingering illness arises from some defect there. Chronic Hepatitis the most frequent form of the disease in this country, is slow in its progressive stages. The organ of attack will be for years suffering under its undermining influence, and yet no real disease will indicate to the patient the alarming state under which he is laboring; any transient indisposition he imputes to a different cause, never suspecting that the liver being affected is the latent source of these disturbed sensations; thus misled, it is not in his power to take the necessary precautions to guard against this insidious enemy to his repose. The symptoms of this disease are often slight and felt for a considerable time, such as fullness after meals, accompanied by oppression, a feeling of vacuity at the pit of the stomach, the mind becomes irritable, memory defective, incapacity for mental exertion prevails, the appetite becomes variable, tongue furred, mouth clammy, taste vitiated, slight noise causes a start, sleep disturbed with frightful dreams, occasionally an obtuse pain in the right side, extending to the top of the shoulder, cramp or spasm is often experienced, and nervous twitching of the muscles and aching pain of the limb, nervous or sick headache is generally caused by it. It often appears in the form of cough, asthma, or as a diseased state of the liver, either by sympathy or pressure, induces a derangement of the functions of the lungs and occasions these disorders. By changing the morbid state of the liver, the irritation of the lungs immediately gives way. The liver is indeed connected, primarily or secondarily, as cause or effect, with various diseases of the head as well as other parts of the system.

From these views, then, there can be no doubt that the disorders of the liver are of the first importance, and every effort used to remedy them should be conducted on rational principles, and by timely and efficient attention and the use of the most proper medicines, many very serious consequences may be prevented, which too often are entailed on the constitution by procrastination.

As a remedy peculiarly adapted to the cure of liver affections, Dr. Starkweather's Hepatic Elixir has proved to be the most potent and efficacious, and every day's experience confirms more positively this assertion. It is candidly believed that no preparations has ever been before the public that has met with such unexampled approbation from distinguished sources, disinterested judges, and grateful patients as this medicine, and a greater amount of suffering has been mitigated and more cures permanently effected by it than any other medicine extant.

So confident is the proprietor of its curative properties in every case, that when the medicine is used according to his directions and the patient is not satisfied or convinced, after using one bottle, that it has not produced a beneficial effect, his agents are authorised to refund the money paid for it on return of the empty bottle.

Invalids are solicited to try the experiment, as no injury can possibly arise from it, but that greatest of all earthly blessings, restored health may result from it.

For sale by CHARLES DYER, Jr. General Agent for the United States, to whom applications for agencies must be made, 42 West-minster street, and by druggists generally throughout the State. j11

IMPORTANT TESTIMONY.—If further proof

is required to establish the fact of the inestimable value of Dr. Starkweather's Hepatic Elixir, the following communication from the Hon. Samuel W. King, Governor of the State of Rhode-Island, contains adequate testimony to substantiate it beyond dispute, and must put entirely at rest the idea that this potent remedy is classed with the many useless and dangerous nostrums which are palmed upon the public merely for the sake of gain.

Please read the following statements communicated to the undersigned by His Excellency, under date of

JOHNSTON, Jan. 29, 1842.

Charles Dyer, Jr. :—My Dear sir—Your communication of yesterday, asking my opinion of Dr. Starkweather's Hepatic Elixir, has been received this morning. In reply, I will inform you that my confidence in patent medicines generally is not very flattering. I have had too much reason to believe that unprincipled men will often palm upon their fellow-citizens their useless, if not dangerous nostrums, for the sake of gain, the use of which, take up that important and critical period of time, without producing any good effect, when otherwise perhaps, proper remedies would have been used, and much suffering and distress prevented. For that reason, I have not used them, feeling myself and family to be much safer under the direction of my family physicians; but having been afflicted for the last six years with difficulties in the side and chest, uncomfortable and often distressing, painful and somewhat alarming, and from which I could get only temporary relief, I very fortunately noticed your advertisement of the medicine in question.

I have been a school-boy with Dr. Starkweather, and had with him a long and intimate acquaintance when we were young men, and from my knowledge of him, I thought him incapable of practising deception on any person; this fact induced me to try Dr. Starkweather's Hepatic Elixir, and by its use I now believe myself to be entirely cured.

I need not, therefore, say to you that I consider it of great value. I certainly think its discovery of great public importance.

The first bottle I took gave me much relief, which regularly progressed, until I had taken six bottles, when I discontinued it, having, thank God, no further use for it at present.

With much regard and respect,

Your ob't and humble servant,

SAM'L. W. KING.

Long by Lunar — 66.52 West

Ship Hope Homeward April 1847

Friday April 23^d All this day light wind from E to S E
and very clear fine weather plyed to the South under all sail
Latitude 31.31 North Longitude 67.27 West

Saturday April 24th first and middle light breezes
from S E. and fine clear weather latter fresh
breezes from S W. and cloudy. Breewing on
passed an English Schoop of steering S E -
spoke. Schooner Comet of Washington & Carolina
Latitude 32.46 North Longitude 68.00 W

Sunday April 25th first part strong breeze from W S W.
and cloudy. middle fresh gale from S W. and rugged squally
weather plyed to the S. under close-reeft sails and reef-
foresail latter part strong breeze from S E. with passing
clouds. with a big short sea from S. growing better
Latitude 33.30 North Longitude 69.02 West

Monday April 26th first and middle light airs from E by S
to S E. and good weather steered S. with all sail set. with
a short-headed bad sea. latter strong gale from E. S E. and
squally rugged weather. plyed to the S West under close-
reeft sails. dark cloudy bad weather to end
Latitude 35.00 North Longitude 69.41 West

Tuesday April 27th first and middle light wind from
S W. to S E. latter a stiff gale from W by S. and very
rugged steered S by W. under single reef sails with
topgallant sails set. so end blowing on.

Latitude 36.40 North
Longitude 70.00 West

Ship Hope Homebound April 1847

Wednesday April 28th Begins with strong gales from W.S.W. and very rugged played to the South under Double reefed sails. Middle part increases. hauled the fore and main topsails. Brought her down to A. Close reefed main topsail and reefed foresail steered S by W. Latter light breezes from S. and fine clear pleasant weather the very smooth to end this day
Latitude 37.30 North Longitude 71.00 West

Thursday April 29th Begins with light breezes from S. and fine Latter strong breezes from S.W. and smoky steered S S.W. under all sail saw 2 ships one Bound E. and the other W.S.W. to end Breezing on
Latitude 38.43 North Longitude 70.30 West

Friday April 30th Begins with fresh gales from S.W. and rugged smoky weather steered S.W. under Double reefed sails. Barometer down 29 1/2 at six P.M. shortened sail to A. Close reefed main — topsail and reefed foresail. Brought the ship to the wind Expecting A. hard gale middle the wind hauled sudden to the W.S.W. with A. tempest very little wind Latter Light wind from S. with A. Big swell from S.W. saw several sail to end calm
Latitude 39.15 North Longitude 71.52 West

Saturday May 1st Begins with A. fine breeze from S.W. and pleasant steered S.W. by S. under all sail. at 11 P.M. the hauled sudden to the S.S.W. and continued so through the day
Latitude 39.30 North Longitude 72.05 West

Ship Hope Hornsby May 1897

Sunday May 2^d Begins with faint airs from S.W.
middle gradually hails S to E and Breeces latter strong
Breeze from E. and fine pleasant weather steered S. under
All sail. Sounded and got Bottom in 40 fathoms Water
Spoke A. New York Bark 15 hours from N York, he
said that Block Island Bore S. Dist 35 or 40 miles to E.
Latitude By A. 40. 40 N. Long By A. 72. 00 West
Saw eight or ten. Briggs schooners and ships -

Monday May 3^d Begins with ~~strong~~ fresh gales
from E. and ~~the~~ rainy weather steered S. until
4 past 1 P.M. Sounded and got ground in 30 fathoms
it came on to blow and rain and the fog wore
to the South. and lost sight the fore and main
topsails. and double reef the main. and reef
foresail, Carrying on her to kill to work off
shore again. Blowing a gale from S.E.
middle part wind hails South and moderates
some set the jib and spanker and wore ship
to the S.E.

- from the spirit world

Dear Husband

I am very glad to see
you tend the circles in the course
of a year you will be the happi-
est man in New Bedford
if you tend these circles
every night you and
your wife come here
to morning and
I will take with you
more of your daily know-
how much I hope I am
in the spirit world you
would be assisted for
we have roses for
peace & harmony
forever & ever

Lydia Bymes

legals &c
you have married
yes yes

Take care of him
mostly yes higher
